HEGEL

SOUNDENGINE

Hegel SoundEngine amplifiers use up to 65 % less power than other amplifiers when in idle. This helps preserve nature.

HEGEL H70 w/digital inputs

The H70 entry-level Hegel amplifier is based upon the hugely successful H100. The H70 will boost a powerful 2*70 watt in 8 ohms and it is the first integrated Hegel amplifier with a fully balanced pre-amplifier stage. The H70 has both analog balanced and unbalanced, as well as digital inputs (USB, optical and coaxial).

- "Recommended product" - *Lyd & Bilde Norway 2010*

- "Best Buy" - *Haute Fidelité France 2010*
- "Amplifier of the year" - *BildLjud Hemma Sweden 2010/11*
- "One of the best value in its class" - *EvMag - France 2011*
- "In a class of its own I would say" - *HVT Holland 2010*
- "Editors Choice" - *HiFi Choice Poland 2011*

HEGEL H100 - USB

The H100 has a USB soundcard that allows you to easily connect any computer, and get all sound digitally through the HEGEL. It has also got a Home Theatre RCA input for use with external surround sound systems. The H100 gives 120 watts per channel in 8 ohms.

- "One of the best audio pieces i tried this year" - *HE Mag. USA 2010*
- "A superb amplifier" - *AV Review USA 2010*
- "Best buy" - *Haute Fidelité France 2009*
- "Astonishing" - *What HiFi France 2009*
- "Reccomended" - *HiFi4all.dk Denmark 2009*
- "very high CP figure" - *StereoSound Japan 2009*
- "System of the year" - *Fidelity Norway 2010*
- "Two thumbs up" - *HiFi & Musik Sweden 2009*
- "Beautiful..." - *The Absolute Sound 2010*
- "One of the 30 biggest bargains in high end Audio" - *TAS USA 2011*

HEGEL H200

The extremely powerful integrated amplifier H200 fills the gap between the H100 and the P4A/H20 combination. With its powerful 2*200W in 8 ohms and a dual mono power supply it can drive almost any speaker. It has also got a Home Theatre RCA input for use with external surround sound systems. RC2 remote is included with the amplifier.

- "A formidable competitor" - *www.Soundstage.com USA 2010*

HEGEL H20 Next-Gen

The HEGEL H20 is our entry level power amplifier, and the first regular power amplifier to receive the next generation of Hegel technology. The new FET transistor implementation in combination with the best ever SoundEngine gives more natural and realistic sound than you ever thought possible. The H20 gives 2*200 watts in 8 ohms, and thanks to the SoundEngine, it has a damping factor of more than 1000.

- "Award for good sound" - Japanese Radio committee 2010
- "Reviewers Choice" - Soundstage USA 2011
- "5-out-of-5 stars" - High Fidelity Greece 2011
- "29-out-of-30 points" - Haute Fidelite France 2011
- "Fabolous" - Hjemmekino Norway 2010

HEGEL P4A

Internally the P4A is using true balanced signal processing from input to output. The P4A is using more advanced line amplifier stages than the P2A with even better components and an even more precise volume control. So the P4A will have a larger dynamic range, a lower coloration and an even better output drive than the P2A.

- "10 out of 10 for sound" - HiFi & Musik 2010
- "Best buy" - StereoSound Japan 2009

HEGEL H4SE

The H4SE is the improved version of the very cornerstone of the Hegel amplifier range. The SE-version have received the same FET-technology as the H20, reducing higher order harmonic distortion, giving you a smoother and more natural sound. Combine that with the H4SE's 300 watts per channel and you have a truly dynamic amplifier in your hands.

- "Amplifier of the year" - Japanese radio comitee 2008 (prev.ed)
- "Best buy" - StereoSound Japan 2009 (prev.ed)
- "Amplifier of the year" - HiFi Review, Hong Kong 2010

HEGEL P30

The P30 Reference pre amplifier is our first pre amplifier with the SoundEngine technology. This further reduces all types of distortion. All in all the gain stage in the P30 only have one pair of carefully hand matched FET transistors per phase. This eliminates all kinds of higher order harmonic distortion. Combined with the extremely precise and digitally controlled volume attenuator the signal will only pass through 1 pair of transistors and a small array of discrete resistors on its way through the P30. The P30 has a Home Theatre-input, 2 pairs of balanced inputs, 12V trigger output and 3,5mm IR-direct input.

- "Amplifier of the year" - High Fidelity Poland 2011
- "Amplifier of the year" - Lyd & Bilde Norway 2011

HEGEL H30 MONO

The H30 with its more than 1100 watts per channel into 8 ohms is a true Nordic beast. Thanks to the SoundEngine technology it will also nearly double all the way down to 1 ohm. The H30 is clearly a contender for the best power amplifier in the world, regardless of price. The H30 uses the very best of Hegel's technology. With Hegel's unique SoundEngine technology and the latest FET-technology incorporated in more stages than ever before, the H30 has extremely low distortion. Less distortion brings you so much closer to the music, and this is about as close as you get.

HEGEL CDP2A/CDP4A

Oscar Wild once said, "My taste is simple. The best has always been good enough". Our two CD-Players are fully designed by Hegel, and have received praise from all over the world. They share the same design and drive, but the CDP4A uses a significantly improved DAC and analog stage.

- "Best buy" - Haute Fidelité France 2009
- "Best buy" - StereoSound Japan 2009
- "Great player" - New Audiophile China 2009

"If you're looking for your final CD player, the one that will last you until hi-rez downloads become commonplace, and you don't feel like spending all of your kids' college fund on it, then find a Hegel dealer and give the CDP2A a good listen. I believe that you'll walk away impressed. For under three grand, it's as fine a CD player as I've heard. And it looks great" - SOUNDSTAGE USA 2010

HEGEL HD11

The HD11 uses a brand new 32 bit DAC-chip, allowing unsurpassed levels of detail and precision. With its four digital inputs, including USB (24 bit), you can use it to upgrade all your digital sources. The Hegel HD11 uses Hegel's proprietary technology to refine the signal from all digital players, making them sound more natural and musical. Even mp3 or streamed music from iTunes will get a significant upgrade with an HD11. The HD11 comes with a Hegel system remote control (RC7)

An extra feature that many will find satisfying is the ability to remote control all common media players in computers. As long as they are connected with USB you can skip, play and pause media players and streaming services on your MAC or PC.

stereoplay

HEGEL HD2

The HD2 is the entry level DAC. It is a pure USB-DAC and is powered from the USB port. The outputs are both analog RCA, so you can connect it to a normal analog amplifier, as well as coaxial digital. The latter allows you to simply use Hegel's 24bit/96kHz USB-receiver and advanced re-clocking to upgrade an existing DAC or Home Theatre receiver.

- "STAR" - Stereo & Video Russia 2011
- "5-out-of-5 stars" - Audio Video Polan 2011
- "Recommended" - HiFi Music Israel 2011

HEGEL HD20

The HD20 is both a DA-Converter and a pre amplifier. With its unique impedance matching technology and improved USB receiver it is sonically far superior to the HD2 and HD10. In addition to that you get a system remote control you can use with both the HD20 and other Hegel units, such as amplifiers or CD-Players.

The HEGEL HD20 also has a built in high quality volume control, so you can connect it directly to a power amplifier or a pair of active loudspeakers.

Unique re-clocking

The Hegel DAC's incorporates the unique re-clocking system, designed in-house by Hegel. This significantly reduces jitter and improve sound-quality, even from poor sources like a laptop.

Remote control your computer

If you start a playlist on your computer you can use the skip +/- and play/pause buttons on the HD20/11 remote to control and maneuver around the playlist on any PC or MAC. Only requirement is that it must be connected via USB.
