

# The New Wine

*"We wanted to create something beautiful... beautiful in sound, looks and connectivity. The Röst is all that. It is the sum of everything we have learned. A true one-stop amplifier. Something you would want to have on the top shelf."

## **HEGEL RÖST - Integrated amplifier with AirPlay and IP-control**

Imagine a small, good looking, and incredibly versatile piece of audio kit that can power some of the most difficult loudspeakers you would ever want. Imagine a true high fidelity solution you can use with your iPhone, integrate in your "smart home" and that plays all your favourite music the way it was intended. No distortion of the original music signal. No distortion to the looks of your living room... you have just imagined the Röst.

## Röst Integrated amplifier w/AirPlay

Röst is the name of one of Norway's most beautiful islands. Way up north in Lofoten. About as far out from the mainland as you can get. The name fits like a glove.

Röst can also mean "voice", and the Röst is truly the "voice of Hegel". With the patented SoundEngine amplifier technology, highly advanced preamplifier and delicately designed D/A-converter, the Röst sounds fluidly natural and dynamic. It preserves all the tiny details that create the feeling of being there, and delivers deep, thundering bass when needed.

The Röst easily connects to any device you want: a CD-player, a streamer, a computer or perhaps Google Cast Audio? You can connect your iPhone, Macbook or even an AppleTV using AirPlay. Or maybe integrate a Sonos Connect? The choice is yours.

Hegel Röst is designed to make everyday devices sound as good as possible, and to make audiophile devices sound even better. We achieve this using proprietary technology developed in-house by Hegel.

The Röst is available in a smooth, white, painted, aluminium and steel chassis. Even the knobs are made of solid aluminium, and have the same comfortable touch. Together with the white, slightly dimmed OLED display, this is a unit you would easily have visible in the home. Ready to be used with your speakers or headphones.

The Röst comes with a remote control, made from a solid block of aluminum, but is also IP-controllable and may be integrated in most smart-home solutions.

### TECHNICAL SPECIFICATIONS

Power output spk	75 w/pc into 8 Ohms
Analog inputs	1 balanced (XLR), 1 unbalanced (RCA), 1 home theatre
Analog outputs	1 variable line level (RCA)
Digital inputs	1 coaxial, 3 optical, 1 USB, 1 ethernet (RJ45)
Control input	1 ethernet (RJ45)- combined control and streaming
Frequency response	5Hz-180kHz
Signal-to-noise ratio	More than 100dB
Crosstalk	Less than -100dB
Damping factor	More than 2000 (main power output stage)
Dimensions	8cm (10cm w/feet) x 43cm x 31cm (HxWxD)
Weight	12kg shipping weight
Dimensions US	3.15" (3.94" w/feet) x 16.93" x 12.20" (HxBxD)
Weight	24.46lbs shipping weight
